

PRM Inclined Plate Clarifiers

Absolute Quality is our Goal... Genuine Service is our Habit!

Absolute Quality:

PRM Plate Clarifiers utilize Bernoulli's Principal to provide high efficient fluid separation with low maintenance that can operate as a standalone system or used with integrated packages.

These industrial-duty units are designed for flow rates from 1 to 100 GPM. PRM clarifiers are manufactured using heavy gauge 304 stainless steel.

Flows up to 100 GPM

Features Include:

- Skid Mounted, Steel Welded Frame
- Stainless Steel Welded Construction
- Excellent separation of suspended solids
- Separation of hard to settle solids
- Options for different sq. ft. of projected plate surface area
- Vent Port, Sump Drain, Cleanout Port
